OF
KITCHEN GARDEN, FLOWER, TREE & GRASS
SEEDS,
BULBOUS AND DAHLIA ROOTS;
GREENHOUSE PLANTS;
GARDENING, AGRICULTURAL, AND BOTANICAL
BOOKS;
GARDENING TOOLS, ETC.

SOLD BY
JAMES M. THORBURN & Co.,
SEEDSMEN AND FLORISTS,
No. 15 John Street, near Broadway.
GARDEN AND GREENHOUSES AT ASTORIA, LONG ISLAND,
SIX MILES FROM NEW-YORK,
On the Banks of the East River, near Hurlgate.

"As Gardening has been the inclination of kings and the choice of philosophers, so it has been the favourite of public and private men; a pleasure of the greatest, and the care of the meanest: and indeed an employment and profession for which no man is too high nor too low."

NEW-YORK.
VINTEN, PRINTER, 63 VESEY STREET.
1844.

DIRECTIONS FOR TRYING SEEDS.

Prove seeds by sowing a few in a small pot or box of light loose earth, and placing it in a warm room, exposed to the sun : keep the earth moist, and if the seed is good, it will vegetate in a reasonable time, except peas and beans, which should be tried by sowing a few in the open ground.

The bug-holes frequently seen in peas, are not occasioned by age, but are the work of an insect, which deposits its eggs in the flower, and matures with the pea ; when it eats its way out at the side, leaving the eye of the pea uninjured ; this of course does not destroy its vegetating power.

If the seeds do not grow after being tried as above, they may be returned, when they will be replaced with other seeds, or the money refunded.

JAMES M. THORBURN & Co.

PREFACE.

IN arranging the materials for this Catalogue, the subscribers have thought it most convenient for reference to keep the Vegetables together, and to place the directions for their cultivation immediately afterwards; and in the same manner with the Flowers and the Green-house department.

The collection of *bulbous flowers* has been greatly enriched by many new and fine varieties from Holland; and among the *Dahlias* will be found the latest and most splendid kinds originated in England; whose gardeners, it is well known, are celebrated for their skill in floriculture. The additions to their *Camellias* and *Geraniums*, are of the most rare and magnificent description. They have procured many new and beautiful *Annuals* and *Biennials*; and their collection of *Kitchen Garden Seeds* contains every useful kind of Vegetable, cultivated either in private gardens, or for the market. The whole of which they take this opportunity of recommending to their friends and the public, with the assurance that they may always rely on being served with the best and most genuine articles.

The following sensible observations are so well expressed on the beneficial effects of flower culture, that they take great pleasure in giving them a place here.

“The interest which flowers have excited in the breast of man, from the earliest ages to the present day, have never been confined to any particular class of society, or quarter of the globe. Nature seems to have distributed them over the whole world, to serve as a medicine to the mind, to give cheerfulness to the earth, and to furnish agreeable sensations to its inhabitants.

“The savage of the forest, in the joy of his heart, binds his brow with the native flowers of the woods, whilst taste for their cultivation increases in every country, in proportion as the blessings of civilization extend.

“From the humblest cottage enclosure, to the most extensive park and grounds, nothing more conspicuously bespeaks the good taste of the possessor than a well cultivated flower garden; and it may very generally be remarked, that when we behold an humble tenement surrounded with ornamental plants, the possessor is a man of correct habits, and possesses domestic comforts; whilst on the contrary, a neglected, weed grown garden, or its total absence, marks the indolence and unhappy state of those who have been thus neglectful of Flora's favors.

“Of all the luxurious indulgences, that of flowers is the most innocent. It is productive not only of rational gratifications, but of many advantages of permanent character. Love for a garden has a powerful influence in attracting men to their homes; and, on this account,

every encouragement given to increase a taste for ornamental gardening, is additional security for domestic comfort and happiness. It is likewise a recreation which conduces materially to health, promotes civilization, and softens the manners and tempers of men. It creates a love for the study of nature, which leads to a contemplation of the mysterious wonders that are displayed in the vegetable world around us, and which cannot be investigated without inclining the mind towards a just estimate of religion, and a knowledge of the narrow limits of our intelligence, when compared with the incomprehensible power of the Creator.

"Flowers are of all embellishments, the most beautiful; and of all created beings, man alone seems capable of deriving any enjoyment from them. The love for them commences with infancy, remains the delight of youth, increases with our years, and becomes the quiet amusement of our declining days. The infant can no sooner walk, than its first employment is to plant a flower in the earth, removing it ten times an hour to wherever the sun seems to shine most favourable. The schoolboy, in the care of his little plot of ground, is relieved of his studies, and loses the anxious thought of the home he has left. In manhood our attention is generally demanded by more active duties, or more imperious, and perhaps less innocent occupations; but as age obliges us to retire from public life, the love of flowers and the delight of a garden, return to soothe the later period of our life.

"To most persons, gardening affords delight as an easy and agreeable occupation; and the flowers they so fondly rear, are cherished from the gratification they afford to the organs of sight and sense; but to the close observer of nature, and the botanist, beauties are unfolded and wonders displayed, that cannot be detected by the careless attention bestowed upon them by the multitude.

"In their growth, from the first tender shoots which rise from the earth, through all the changes which they undergo, to the period of their utmost perfection, he beholds the wonderful works of creative power; he views the bud as it swells, and looks into the expanded blossom, delights in its rich tints, and fragrant smell, but above all, he feels a charm in contemplating movements and regulations, before which all the combined ingenuity of man dwindles into nothingness."

JAMES M. THORBURN & Co.

CATALOGUE.

KITCHEN GARDEN SEEDS.

ARTICHOKE—ARTICHAUT—CINAUCO.

Green Globe. 50 cts. per oz.

Sow in April, or plant young suckers.

ASPARAGUS—ASPERGE—ESPARRAGO.

12½ cts. per oz.

Giant

Large White Reading

Battersea

Sow in April, in rich soil.

BEANS—(English Dwarfs)—FEVE DE MARAIS—HABA.

25 cts. per quart.

Early Mazagan
Broad Windsor
Sword Long Pod

Green Nonpareil
Scarlet Flowering Long Pod
Horse

Plant early in spring.

BEANS—(Dwarf or Snaps)—HARICOT—FASOLES E JUDIAS

25 cts. per quart.

Early China
Early Cluster
Early Dun-colored
Early Half Moon
Early Mohawk
Early Rachel
Early St. Valentine
Early Yellow Six Weeks

Red Cranberry
Warrington, or Marrow
Refugee, or thousand to one—
good for pickling or laying
down in salt
Rob Roy
Large White Kidney, or Royal
Dwarf

Plant about the end of April for first crop, and at intervals through the season, finishing about the end of August.

POLE OR RUNNING.

Saba, or Carolina
Dutch Case Knife

Red Cranberry
White Cranberry

50 cts. per quart.

Large White Lima
Speckled Prolific Lima
Asparagus, or Yard Long

White Dutch Runners
Scarlet Runners
London Horticultural

Plant about the beginning of May.

BEET—BETTERAVE—BETERRAGO.

12½ cts. per oz.

Early Turnip
Early White Scarcity
Long Blood Red

Swiss Chard, or Sir John Sinclair's
Mangel Wurtzel

French Sugar, or Silesia

25 cts. per oz.

Yellow Turnip, Bassano (new) Green (for stews or soups)
Sow from the middle of April to June.

BORECOLE—CHOU VERT—COL.

25 cts. per oz.

Sow from April to August.

BRUSSELS SPROUTS—CHOU DE BRUXELLES.

25 cts. per oz.

Sow in May, and transplant in July.

BROCOLI—BROCOLI—BROCOLI.

50 cts. per oz.

Early White
Early Purple

White Cape, or Cauliflower
Purple Cape

Sow Cape Brocoli from 10th to 20th May, and transplant early in July.

COLEWORT, OR COLLARDS. 25 cts. per oz.

Sow from April to May.

CARDOON—CARDON—CARD O.

Large Solid Stalked. 50 cts. per oz.

Sow in April for an early, and in June for a late crop.

CABBAGE—CHOU POMME—BERZA.

25 cts. per oz.

Early Dutch	Early French Ox Heart
Early Drumhead, or Battersea	Heale's Early Imperial
Early Hope	Large Drumhead
Early May	Late Sugarloaf
Early Screw	Large Bergen or Grt. American
Early Salisbury Dwarf	Large Green Glazed
Early Wellington, or Royal	Tree or Thousand Headed
George	Large German
Early Vanack	Green Globe Savoy
Early Emperor	Yellow Savoy
Early York	St. Denis Drumhead
Early Savoy	Turnip Rooted, or Kohl Rabi,
Early Sugarloaf	above ground
Early Sprotsboro'	Turnip Rooted, below ground

Red Dutch for Pickling

Those not denominated Early, are Winter Cabbages.

Sow for early Cabbages, about the middle of September, and cover in winter with straw; and for late, the middle of May, or hot-beds in February.

CARROT—CAROTTE—CHIRIVIA.

12½ cts. per oz.

Early Horn	Large White Field, (best for
Long Orange	cattle)
Blood Red	Altringham

Sow from April to June.

CAULIFLOWER—CHOU-FLEUR—BERZA FLORIDA.

50 cts. per oz.

Large Early Late Dutch Large Asiatic (fine)

Sow about the 20th of May for late—September in frames for early.

CHERVIL—CERFEUIL—PERIFOLIO.

25 cts. per oz.

Sow early in Spring, and at intervals.

CELERY—CELERI—APPIO HORTENSE.

25 cts. per oz.

White Solid	North's Giant Red
Rose Colored Solid	Lion's Paw, large white
New Silver Giant	Celeriac, or turnip rooted

Sow in April for Early, and for Winter the end of July.

CORN SALAD, OR VETTICOST—MACHE.

25 cts. per oz.

Sow in August and September.

CRESS—CRESSON ALENOIS—MASTUERZO.

Curled or Pepper Grass. 12½ cts. per oz.

Broad Leaved Garden. 25 cts. per oz.

Water (true) 50 cts. per oz.

Sow three or four times a month.

CUCUMBER—CONCOMBRE—PEPINO E COHOMBRO

25 cts. per oz.

Early Frame	Short Prickly
Early White Spined	Green Cluster
	Long Prickly.

50 cts. per oz.

Long Green Southgate	Long White Turkey
Long Green Turkey	Small Gherkin

Roman Emperor, Prize Fighter, &c., for frames, imported from London—25 cts. package.

Plant about the first week in May.

ENDIVE (Succory)—CHICOREE—ENDIBIA.

25 cts. per oz.

Green Curled	Broad Leaved Batavian (best for
White Curled	winter)

Sow in July.

BURNET GARDEN---PETITE PIMPRENELLE---PIMPINELA

12½ cts per oz.

Sow in May.

INDIAN CORN.

6 cts. per ear, or 25 cts. per quart.

Early Golden Sioux

Early Canadian

Early Tuscarora

Early Dutton

Sweet or Sugar

Nonpareil, or Pearl

Chinese Tree Corn

Plant about the first of May, and at intervals.

KALE—CHOU VERT OU NON POMME—COL.

25 cts. per oz.

Green Curled Scotch

Cesarean or Cow Cabbage

Purple Curled

Sea—Chou Marin—Col Marina.

Sow in May.

LEEK—PORREAU—PUERRO.

25 cts. per oz.

Large Scotch Flag

London

Sow early in April.

LETTUCE—LAITUE—LECHUGA.

25 cts. per oz.

Early Curled Silesia

Large Green Head, or Cabbage

Imperial Cabbage

Hardy Green

Brown Dutch

Grand Admiral

India Cape.

50 cts. per oz.

Tennis Ball

Madeira, or Passion

Magnum Bonum Coss

White Coss

Paris Green Coss

Ice Coss

Sow about the middle of September; also on hot beds in March, and afterwards at intervals.

EGG PLANT—MELONGENE—ALBERENGEN.

\$1 per oz.

Purple (edible)

White (ornamental)

Sow in hot beds in March.

MELON—MELON—MELON.

Long Island Water. $12\frac{1}{2}$ cts. per oz.

25 cts. per oz.

Green Citron

Murray's Pineapple

Persian

Nutmeg

Large Yellow Canteleupe

Skillman's Fine Netted

Carolina Water

Citron Water, (for preserves)

Minorca, or Netted Canteleupe.

50. cts. per oz.

Pomegranate or Musk scented—Apple Seeded Water,
Goodwin's Imperial Water, (scarlet flesh)

Plant about first week in May.

MUSHROOM SPAWN—CHAMPIGNON—SETA.

In parcels at 50 cts.

MUSTARD—MOUTARDE—MOSTAZO.

White, 50 cts. per quart. Brown $37\frac{1}{2}$ cts. per quart.

Sow in April, and at intervals

NASTURTIUM—CAPUCINE—CAPUCINA.

25 cts. per oz.

Sow about the first of May.

ONION—OIGNON—CEBOLLA.

Large Red. $12\frac{1}{2}$ cts. per oz.

25 cts. per oz.

White Portugal

Yellow Dutch

Madeira, (genuine imported)

Silver Skinned

Strasburgh

Sow early in Spring

OKRA.

 $12\frac{1}{2}$ cts. per oz.

Sow at the beginning of May.

PARSNIP—PANAIS—ZAMAHORIA.

12½ cts. per oz.

Large Dutch, or Swelling Guernsey, or Cup

Sow early in Spring.

PEAS—POIS—GUISANTE.

25 cts. per quart.

Early Washington	Bishop's Prolific
Early D'ble Blossom Frame	Dwarf Blue Imperial
Early Nimble Dick	Dwarf Blue Prussian
Early Frame, or June	Dwarf Prolific, or Strawberry
Early Golden Hotspur	Dwarf Marrowfat
Early Charlton	Dwarf Scimeter
Early Warwick	Gray Rouncival

37½ cts. per quart.

Groom's Early Dwarf Matchless, or True Tall Marrowfat

50 cts. per quart.

Early Cedo Nulli or Race Horse ;	Knight's Tall Marrow
ready for table third week of	Woodford's Tall Prolific
May	Tall Crooked Pod Sugar
Dwarf Spanish, or Fan	Knight's Dwarf Sugar, or Mar-
Dwarf Sugar	rows
Waterloo Blue	Giant Marrow

Sow as early as possible, and at intervals, till the end of August.

PARSLEY—PERSIL—PEREJIL.

12½ cts. per oz.

Curled, or Double Plain, or Single.

25 cts. per oz.

Hamburgh, or Large Rooted Dwarf Curled, (very double)
True Giant

Sow from April to August.

PEPPER—PIMENT.

50 cts. per oz.

Long Cayenne	Bell, or Ox Heart
Tomato Shaped, or Squash	Cherry

Sweet Spanish (used as a salad) \$1 per oz.

Sow about the First of May.

PURSLANE—POURPIER—VERDOLAGA.

25 cts. per oz.

PUMPKIN.

Large Cheese. 12½ cts. per oz.

Connecticut Field. 37½ cts. per qt.

Mammoth. 50 cts. per oz.

Yellow Family. 50 cts. per qt.

Plant early in May.

RADISH—RADIS ET RAVE—RABANO.

12½ cts. per oz.

Early French Olive Shaped

Early Scarlet Short Top

Long Salmon

Purple Short Top

Black Fall, or Spanish

Long White Naples

Cherry or Scarlet Turnip

Violet Colored Turnip

White Turnip

Yellow Turnip, summer and fall

Sow early, and at intervals.

ROQUETTE. 25 cts. per oz.

RHUBARB—RHUBARBE—RUIBARBO.

Myatt's Scarlet Victoria. 50 cts. per oz.

Sow in November, or early in Spring.

SPINACH—EPINARDS—ESPINACA.

12½ cts. per oz.

Round Leaved Savoy

Prickly

Sow early—then in August; and about the 10th September for early Spring use.

SQUASH—COURGE—CALABAZA.

12½ cts. per oz.

Early Green Striped Bush

Early Scollop Bush

Summer Crook Neck

Long Crook Neck

50 cts. per oz.

Vegetable Marrow
Acorn, or CaliforniaCocoa Nut, or Com. Porter's
Egg, or Apple, 25 cts. per oz.

Plant early in May.

SORREL—OSEILLE—ACEDERA.

25 cts. per oz.

Sow in April.

SALSIFY—SALSIFIS—BARBA CABRUNA.

25 cts. per oz.

Sow in April.

SCORZONERA—SCORZONERE—ESCORZONERA.

25 cts. per oz.

Sow in April.

SKIRRET—CHERVIS—CHIRIVIA—TORDESCA.

50 cts. per oz.

Sow in April.

TOMATO—TOMATE—TOMATE.

50 cts. per oz.

Large Red
Large YellowCherry
Pear Shaped

Sow in May.

TURNIPS—NAVET—NABO.

12½ cts. per oz.

Early Snow Ball
Early Dutch
Early Stone
White Flat, or Globe
Green Top
Red Top
Swan's EggLarge English Norfolk
Yellow Malta
Yellow Stone
Dale's Hybrid. 37½ cts. per oz.
Long Tankard, or Hanover
Long Yellow French
Yellow Aberdeen

Yellow Swedish or Ruta Baga

Sow early for spring use; and about the end of August for fall and winter use.

POT, SWEET & MEDICINAL HERB SEEDS.

Dill	Anethum graveolens
Fennel Sweet	feniculum

Grape	Vitis vinifera

|| Strawberry seed should be sown with the same care as the most delicate flower seed. Cover it lightly, and water it well in dry weather, till it gets strength.

FLOWER SEEDS.

6½ cts. per paper, except those marked * which are 12½ cts.

EXPLANATIONS.

The dots . . indicate a repetition.

3d Column. a., hardy annual; b., hardy biennial; p., hardy

perennial; hba., half hardy annual; hbb., half hardy biennial; ta., tender annual; tb., tender biennial; fa., frame annual; g., greenhouse.

4th Column. Colour—bl., blue; pu., purple; li., lilac; r. red; stri., striped; wh. white; pi., pink; or., orange; yel., yellow; sc., scarlet; var., variegated; dr., dark red; dc., dark crimson; gc., green and crimson; gr., green.

5th Column. Usual height in feet; trai., trailer.

6th Column. Usual month of flowering.

|| Half hardy biennials require the aid of a frame or greenhouse during the winter.—They should be sown in November. Half hardy annuals should be sown in March, in frames or a greenhouse.

The following observations on the delightful influences excited by the cultivation of flowers, are so well expressed, and so true to experience, that I cannot refrain from inserting them in this place.

“The interest which flowers have excited in the breast of man from the earliest ages to the present day, has never been confined to any particular class of society, or quarter of the globe. Nature seems to have distributed them over the whole world, to serve as a medicine of the mind, to give cheerfulness to the earth, and to furnish agreeable sensations to its inhabitants.

“The savage of the forest, in the joy of his heart, binds his brow with the native flowers of the woods, whilst a taste for their cultivation increases in every country, in proportion as the blessings of civilization extend.

“From the humblest cottage enclosure, to the most extensive park and grounds, nothing more conspicuously bespeaks the good taste of the possessor, than a well cultivated flower garden; and it may very generally be remarked, that when we behold an humble tenement surrounded with ornamental plants, the possessor is a man of correct habits, and possesses domestic comforts; whilst, on the contrary, a neglected weed-grown garden, or its total absence, marks the indolence and unhappy state of those who have been thus neglectful of Flora's favours.

“Of all luxurious indulgences, that of flowers is the most innocent. It is productive not only of rational gratifications, but of many advantages of permanent character. Love for a garden has a powerful influence in attracting men to their homes; and on this account, every encouragement given to increase a taste for ornamental gardening is additional security for domestic comfort and happiness.—It is likewise a recreation which conduces materially to health, promotes civilization, and softens the manners and tempers of men. It

creates a love for the study of nature, which leads to a contemplation of the mysterious wonders that are displayed in the vegetable world around us, and which cannot be investigated without inclining the mind towards a just estimate of religion, and a knowledge of the narrow limits of our intelligence, when compared with the incomprehensible power of the Creator."

ORDERS FOR NATIVE AMERICAN TREE, SHRUB, AND PLANT SEEDS,

SUITABLE FOR SENDING TO EUROPE,

Should be sent during the months of November, December, and January.

CATALOGUES FURNISHED.

12½ cents per paper.

DUTCH BULBOUS FLOWER ROOTS,

CONSISTING OF THE VERY FINEST

HYACINTHS, TULIPS, NARCISSUS, CROWN IMPERIALS,
IRIS, AMARYLLIS, &c.

IMPORTED ANNUALLY FROM HOLLAND.

The following, particularly the Hyacinths and Tulips, have been selected with great care from the finest collections in Holland, the flowers of every one of which have been closely observed by the proprietor when in bloom, are therefore not inserted on account of their tasteful names. They are all sterling flowers, and include the very finest grown in Holland, and are remarkable for their variety, size, beauty, and delicacy of tint. They are sold under the same names by which they are imported, and are as low, or lower priced, than any offered by other florists in the United States.

Where the prices are by the assortment or dozen, the selection of the sorts must be left to the proprietor.

Those marked [*] are the earliest flowers, and most proper for blooming in glasses or pots.

Those marked [†] are tender, and require the shelter of a room or greenhouse till spring.

DOUBLE HYACINTHS.

SINGLE HYACINTHS.

Single Hyacinths are not generally held in such high estimation as double ones; but on a closer acquaintance with their fine properties, they will be found more deserving of cultivation. They are desirable for their early flowering, especially in pots and glasses: the colour of many is very brilliant, and they excel the double in their greater profusion of bells.

All the Single Hyacinths are early.

Red.

Double White Garden, <i>P. officinalis fl. albo pleno</i>	0 50
Hundred Leaved, or Mille Petale, <i>large red</i>	0 50
Fennel Leaved, with large light crimson flowers, <i>P. tenuifolia</i>	0 50

The Pæonia whiteleji, humei, and fragrans, are very fine; the flowers are large, and as double as a cabbage rose. It often happens that twelve or fifteen flowers open at once, and present a truly beautiful spectacle. They are nearly hardy, and require no other protection than an armful of straw or salt hay thrown on the ground in December, and removed again about the middle of March. The Pæonia banksia is a shrubby variety, generally attaining the height of three or four feet. As they show the flower buds by the end of March, they are very apt to be injured by the frosts of April. It is well therefore to cover this plant with an empty cask, having a pane of glass in the top. With this little precaution, you will never fail to have a fine bloom about the middle of May. The same remarks apply to the Pæonia paveracea.

MISCELLANEOUS SORTS.

	each	dozen.
Arum dracunculus, Superb Dragon Plant, with an immense and singular crimson flower	50	
Anemone hortensis or Garden Anemone	25	2 50
Autumnal Flowering Crocus	12	1 00

DAHLIAS.

An annual catalogue of this favorite flower is published every season, and includes every variety of celebrity (in a compass of two hundred sorts,) cultivated in England. The proper season to set out plants in pots is the 1st June. Dry roots ready for exportation to any distance from October to April.

Orders for Bulbous roots should be forwarded from September to December inclusive. In open winters they may be planted at any time when the ground is workable, and the bulb has not grown too much.

BULB GLASSES, various sizes and shapes, plain, colored, or gilt, some with feet, 50 cents to \$1 per pair.

FANCY FLOWER POTS, various sizes and qualities.

COMMON GARDEN FLOWER POTS, of every size.

CROCUS POTS in the form of Bee-Hives, Hedge-Hogs, Flower Baskets, Pyramids, &c., for blowing Crocus Roots in the parlour or greenhouse. Price from \$1 25 to \$5 each.

PARLOUR WINDOW STANDS, of a neat wire work basket form on a foot, to exhibit Hyacinths, Primroses, and other early plants in bloom during winter; various patterns, from \$7 to \$10 each.

Hawthorn Quicks, for live fences or hedges, 4 to \$5 per thousand.

Russian or Garden Bass Mats, \$3 per dozen.

Superior London White Mustard Seed, for Dyspepsia, &c., 37 cents per qt.

ADVERTISEMENT.

 The Greenhouse and Garden of the proprietors are situated at Astoria, near Hurl Gate, Long Island, six miles from the city of New-York, and three and a half from Williamsburgh. Stages to Astoria run several times a day from Chatham street, opposite the City Hall. A steamer also plies from Fulton Market twice a day.

At almost any season of the year visitors will find something in bloom worthy of attention. The Camellia Japonicas are in the highest perfection during February. The finest kinds only are cultivated, and they have been selected from the best collections in Europe. The Camellia is becoming a universal favorite, owing to its beautiful habit of growth and splendid flowers at a season of the year when the Greenhouse would otherwise be comparatively barren of showy flowers. It is of easy culture, requiring a good sandy loam, tolerable moisture, and to avoid placing the plants in a sunny exposure during the summer months, as this materially injures the foliage, turning it to a rusty brown. Camellias should, from June to September, not have the sun longer than 10 o'clock in the morning: frequent sprinkling the leaves with a finely pierced watering pot is serviceable; but syringing them daily with a greenhouse syringe, will not only keep off insects, but greatly strengthen the plant, and enable it to retain the flower buds till the time of flowering: when these form in clusters of three or four, it is advisable to take off all but the one terminating the branch, as it will be much finer than if allowed to flower in a mass.

Roses, of which the assortment is not as numerous as select, are in general bloom from the 15th May to 10th of June.

Geraniums, during June. In this department neither pains nor expense has been spared to enrich the collection with the most beautiful sorts procurable from the magnificent collections round London. The striking beauty of such flowers as Garth's Coronation,

Foster's Nymph, Gaines's King, Sultan, Prince Albert, Conservative, Sylph, Lady Douro, Firebrand, Wildfire, Fairy Queen, Rienzi, and Jewess, will astonish the beholder, and will convince him how important to a select assortment of plants is this charming tribe.

The Cactii genus, many of which are very splendid, as also the Fuchsias, are in bloom from May to August.

The Dahlias are in general flower from the 20th August to the 1st October; and it is admitted by all who have ever visited them during their bloom, that they are altogether unrivalled in this country, and perhaps it would not be asserting too much to say that in no single collection in England can so many of the choicest kinds be seen; owing to the jealousy of the English gardeners with each other, but who willingly dispose of their latest seedlings when to come to this country. Many of these cost from five to ten guineas each when imported, and are first shown in this country in this collection. The subscribers seldom or ever enter their Dahlias for competition at the shows given in this city, it being their wish that their private patrons should carry off these honours. Those who may think the above description overdrawn, are invited to call and pass judgment any time after the 17th of September.

Those who make a selection from a personal examination of any plant grown at this establishment, may depend on being furnished with the precise variety they select, and they will be forwarded at the proper season, carefully packed, to any part of the United States or the West Indies.

JAMES M. THORBURN, & Co.
